EXAMINER

BEAMER, TEMICA M

ART UNIT	PAPER NUMBER
----------	--------------

2681

DATE MAILED: 12/15/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/070,068	Applicant(s) ANDERSEN, NIELS PETER SKOV	
	Examiner Temica M. Beamer	Art Unit 2681	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-65 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-65 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Detailed Action

Claim Objections

1. Claims 8-13, 21-26, 34-39, 45, 46, 52, 53, 56 and 59-61 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should only refer to other claims in the alternative only and/or cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 62-65 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 62-65, they are considered indefinite because they are not specific enough in defining the invention.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2681

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7, 14-20, 27-33, 40-44, 47-51 and 54-58 are rejected under 35

U.S.C. 102(b) as being anticipated by Phillips, U.S. Patent No 6,188,898.

Regarding claims 1, 27, 28 and 54, Phillips discloses a mobile station/system/method comprising means for communicating with the radio telecommunications system means for storing rule information relating to predetermined coding rules: means for retrieving said rule information: means for inherently decoding using the retrieved rule information, signals received from the radio telecommunications system (col. 1, line 65-col. 2, line 23, col. 3, lines 35-40, col. 4, lines 20-27).

Regarding claims 2, 29 and 55, Phillip discloses a mobile station/method/system for communicating with a second mobile terminal station (inherently for call-set-up, during a call) comprising: means for communicating with the radio telecommunications system; means for storing and retrieving rule information relating to predetermined coding rules: means for inherently encoding using the retrieved rule information, signals to be transmitted to the radio telecommunications system (col. 1, line 65-col. 2, line 23, col. 3, lines 35-40, col. 4, lines 20-27).

Regarding claims 3, 29 and 55, Phillip discloses a first mobile station for communicating with second mobile station in a telecommunications system, the first mobile station comprising: means for storing rule information relating to predetermined coding rules: means for communicating with the second mobile station: means for retrieving said rule information; means for encoding or decoding. using the retrieved rule

Art Unit: 2681

information. signals to be transmitted to or signals received from the second mobile station which signals use the predetermined coding rules (col. 1, line 65-col. 2, line 23, col. 3, lines 35-40, col. 4, lines 20-27).

Regarding claims 4, 17 and 30, Phillip discloses a mobile station wherein the rule information is down-loaded to the storing means during registration of the mobile station with the telecommunications system (col. 4, lines 20-27).

Regarding claims 5, 18 and 31, Phillip discloses wherein the rule information is down-loaded to the storing means over a dedicated communications channel (col. 4, lines 20-27).

Regarding claims 6, 19 and 32, Phillip discloses wherein the rule information is down-loaded to the storing means during a dedicated communication period separate from the communication required to register the mobile station with the telecommunications system (col. 4, lines 20-27).

Regarding claims 7, 20 and 33, Phillip discloses wherein the rule information is down-loaded to the storing means as pre-loaded information, prior to registration of the mobile station with the telecommunications system (col. 3, lines 35-40).

Regarding claims 14-16, Phillip discloses a radio telecommunications system comprising: at least one base station; at least one mobile station; the at least one base station including means for transmitting signals to and means for receiving signals from the at least one mobile station; the at least one mobile station including means for receiving signals from and means for transmitting signals to the at least one base

Art Unit: 2681

station: the mobile station including means for storing rule information relating to predetermined coding rules; the mobile station also including means for retrieving said rule information; and the mobile station further including means for decoding using the retrieved rule information signals transmitted by the base station using the predetermined coding rules (col. 1, line 65-col. 2, line 23, col. 3, lines 35-40, col. 4, lines 20-27).

Regarding claims 40 and 47, Phillip discloses a radio telecommunications system for broadcasting encoded broadcast information over a coverage area. comprising: at least one mobile station: the at least one base station including means for transmitting, over the coverage area. generic broadcast information in an unencoded format: the at least one mobile station including means for receiving said generic broadcast information at the least one base station; the mobile station including means for establishing a connection between the mobile station and the base station, using the generic broadcast information; the base station including means for transmitting over the connection to the mobile station, rule information relating to predetermined coding rule: the mobile station also including means for storing rule information; the mobile station further including means for retrieving said rule information; the base station also including means for transmitting over the coverage area non-generic broadcast information encoded using the predetermined coding rules; and wherein said mobile station further includes means for decoding, using the retrieved rule information the non-generic broadcast information transmitted by the base station (col. 1, line 65-col. 2, line 23, col. 3, lines 35-40, col. 4, lines 20-27).

Regarding claims 41 and 48 wherein the alternative to the base station including means for transmitting, over the connection to the mobile station, rule information relating to predetermined coding rules the rule information is down-loaded to the storing means of the mobile station means as pre-loaded information (col. 3, lines 35-40).

Regarding claims 42, 49 and 56, Phillip discloses wherein the rule information is up-dated each time that the mobile station enters a new area of the radio telecommunications system (col. 3, line 55-col. 4, line 8).

Regarding claims 43, 50 and 57, Phillip discloses wherein the rule information is up-dated each time that the mobile station enters a new registration area of the radio telecommunications system (col. 3, line 55-col. 4, line 8).

Regarding claims 44, 51 and 58, Phillip discloses a radio telecommunications system in accordance with claim 40 wherein the rule information is up-dated each time that the mobile station enters a new cell of the radio telecommunications system (col. 3, line 55-col. 4, line 8).

Regarding claims 54 and 55, Phillips discloses a method of programming, by a radio telecommunications system, a mobile station over a connection said system comprising at least one base station comprising: establishing a connection between the mobile station and the at least one base station: the base station transmitting. over the connection rule information relating to predetermined coding rules; programming the mobile station with said rule information: retrieving said rule information: the mobile station encoding or decoding using the retrieved rule information, signals to be

Art Unit: 2681

transmitted to or received from the radio telecommunications system (col. 1, line 65-col. 2, line 23, col. 3, lines 35-40, col. 4, lines 20-27).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bertacci, U.S. Patent No. 6,097,950.

Bertrand et al, U.S. Patent No. 6,408,173.

Gaallagher et al, U.S. Patent No. 5,933,784.

Purcell et al, U.S. Patent No. 6,094,578.

Kulkarni et al, U.S. Patent No. 5,862,481.

Lamb et al, U.S. Patent No. 6,697,620.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Temica M. Beamer whose telephone number is (703) 306-5837. The examiner can normally be reached on Monday-Thursday (alternate Fridays) 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on (703) 308-4825. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2681

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
